Next-gen Unified Product Suite for

# IT Operations Management

Network Monitoring with **Motadata Infrastructure Intelligence Platform (IIP)**

Log Monitoring with **Motadata Data Analytics Platform (DAP)**

Service Automation with **Motadata IT Service Management (ITSM) Platform**

Motadata is a unified IT Network Monitoring, Log & Flow Monitoring and ITSM Platform, offering operational insights into your IT infrastructure and its performance. It is designed to identify & resolve complex problems faster that ensures 100% uptime of all business critical components by offering complete visibility into the health and KPIs of various IT services. It helps in reducing CAPEX, offers Agility to resolve issues faster, is compatible in a hybrid ecosystem, and offers ease of integration with existing and future platforms.

## 360° Visibility of IT Infrastructure

### Network Monitoring
- Firewall
- Router
- Switch
- Generic SNMP device

### Database Monitoring
- Oracle
- MSSQL
- MySQL
- SAP Hana
- PostgreSQL
- IBM DB2
- Sybase

### Virtualization Monitoring
- VMware
- Citrix Xen
- Microsoft Hyper-v

### URL Monitoring
- HTTP
- HTTPS

### Cloud Monitoring
- AWS
- Google App Engine
- Microsoft Azure

### Server Monitoring
- Windows
- Linux
- Redhat
- HPUX
- IBM AIX

### Email Monitoring
- SMTP
- Symantec Gateway
- Exchange

### Application Server Monitoring
- JBOSS
- Weblogic
- GlassFish
- Tomcat

### Web Server Monitoring
- Microsoft IIS
- Nginx
- LIGHTTPD
- Sun Web
- Apache HTTP

### Middleware Monitoring
- DNS
- ActiveMQ
- LDAP

### Platform Monitoring
- Java
- .Net

### Services
- Ping
- NTP
- Port
- SSL Certificate
- FTP
- Domain
- Radius

### Log (SIEM)
- Network log
- Server log
- App log
- Custom Log
- Any Text

### Network Flow
- NetFlow v5
- NetFlow v9
- IPFIX
- sFlow
- jFlow

### ITSM
- Incident
- Change
- Patch
- Service Catalogue
- Problem
- Asset

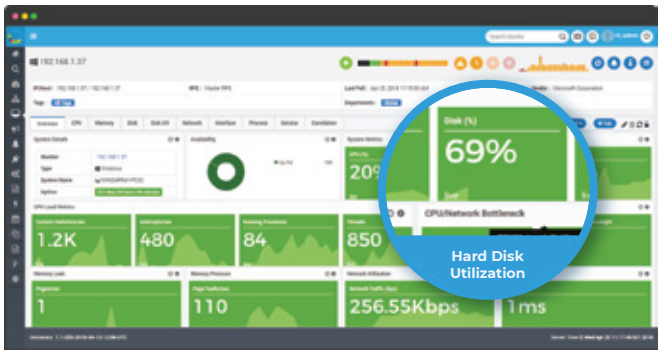
## Infrastructure Intelligence Platform (IIP)

Motadata's Infrastructure Intelligence Platform (IIP) proactively monitors & optimizes all network devices, servers & applications across IT infrastructure to manage network for fault and performance for maximum uptime. The platform collects, discovers & indexes data from multiple sources including databases, webservers, containers, virtualizations, URL, cloud services, middleware etc. The platform enables its users to search, visualize & analyse the data with the help of customizable dashboards & widgets to extract powerful operational intelligence. Motadata uses unique data model to cut through data flood and quickly detect what matters most.

- Network Monitoring
- Server Monitoring
- Database Monitoring
- Virtualization Monitoring
- URL Monitoring
- Cloud Monitoring



### Key Platform Highlights

- Correlate all the IT data over a single platform
- Seamless Integration
- Scalability with Speed
- Future Ready Solution
- Get the Birds Eye View
- Network Configuration Management (NCM)

## Data Analytics Platform (DAP)

Analyse machine data to identify trends and unleash meaningful insights with log & flow management capabilities. Derive undiscovered insights from the vast untouched data with Elastic search precision from our log management & big data analytics platform. Motadata lets users search, monitor, alert and generate reports for all log and flow data in real time. It proactively fights threats with event correlation analytics. The platform processes all kind of log data generated from multiple heterogeneous sources. Know how your network is being utilized by bandwidth monitoring and NetFlow traffic analyser.

- Log Management
- Network Flow Analytics
- Full Text Search
- Log Compression
- Compliance Reporting
- Native Log Collection Agent

### Key Platform Highlights

- Collect and analyse data from any source any format
- Quick & Accurate Search
- Implement Continuous Compliance
- Snap out of Security Breaches
- Understand Bandwidth Utilization
- Quickly find the needle in the haystack

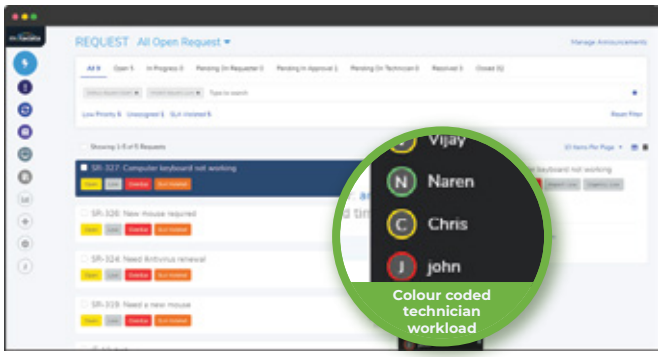
# IT Service Management Platform (ITSM)

PinkVERIFY™ 2011 — 6 PROCESSES

The ITIL Compliant ITSM platform offers a modern interface, built-in templates and guides, instant universal search and meaningful insights that help your IT teams to work effectively and streamline IT service delivery. The Platform drastically reduces the number of incoming tickets, helps in creating a centralized knowledge base, eases the complexity of managing multiple assets, complies to audit requirements and improves performance of IT Service Desk.

- Incident Management
- Problem Management
- Change Management
- Knowledge Management
- Asset Management
- Windows Patch Management



## Key Platform Highlights

- Workflow Automation
- Greater ROI & Boost Productivity
- Seamless Integration
- Auto asset discovery
- Eliminate System Vulnerabilities
- Mobile App - Android and IOS

## Key Differentiators

**1+ Billion**
Events analyzed in less than 10 sec on single server

**100k**
EPS in commodity 4-core server

**85%**
Compression on raw Extracted data

**NO**
No external proprietary Database Common Data Store for KPI / Log / Net Flow

**NO**
No time limits on actual Data retention

**Lowest**
TCO in the industry
No proprietary OS or DB required

**Comply**
with regulatory guidelines – PCI DSS, FISMA, HIPPA

**Integration**
Plugin driven architecture

**Scalable**
Vertical & Horizontal Scalability with RPE
